

Assignment Messaging

In the **Overview** section of the **Assignment Marking** articles, we looked at the ability to send a group message to all students (within a selected assignment navigate to the Actions Cog > Message All).

Please Note – When a teacher uses the functionality Message All, the indicator within the message icon will report an unread message for each individual student associated with the assignment.

After a group message has been sent for a selected assignment, if we navigate back to the Assignments (list) tab within the Markbook application, a blue message icon is displayed against the selected assignment. The number within the message icon indicates how many messages are unread. When a student posts a message back to the teacher on an assignment, the indicator within the message icon will increase to show that there is an additional unread message.

Markbook							Markbooks	Assignments

When selecting the Messages tab, the assignment message wall is displayed providing the following information:

- Ability to post a message back to an individual student regarding their assignment
- Ability to view any messages posted by an individual student
- Ability to view any messages posted by another teacher
- Ability to show / hide any messages posted • Ability to mark the messages as read
