

Why Cardinal Wiseman is the best school

Have you heard of Cardinal Wiseman? If you haven't then let me tell you, how many times have you walked past a school and seen the pupils behaving kindly? The Cardinal Wiseman community is a kind, loving and caring community with plenty of opportunities to learn new things and interact with new people. This wonderful school grants you many possibilities to get into a great university because of our school learning system and the way that pupils remember key knowledge so they can succeed in their GCSE's.

Cardinal Wiseman's teachers are caring, kind and are passionate about the students and the way they learn. The teachers at Wiseman are helpful in every way and they never cease to do so. Teachers make the lives of the students easier by teaching them many different tricks to make equations or essays easier for the student to handle. Many schools believe that learning is just copying and reading from textbooks but teachers at Cardinal Wiseman always find a way to make learning fun and better for the students instead of just sitting in a classroom, on the verge of falling to sleep because it is boring for the students and the teachers. Cardinal Wiseman has a great range of subjects to learn from and develop your knowledge.

Wiseman is an excellent school because of the important equipment that some schools don't even have such as 3D printers and the simplest of things, glues. Wiseman has all of this and much more. Cardinal Wiseman also has nice, clean facilities and organised and decorated classrooms. This helps the students learn in depth. Wiseman also has a range of sporting equipment so the kids can proceed in learning new sports and compete in tournaments such as

rugby and football. This makes school fun as they get to exercise and have fun doing the sports they love. Wiseman also have a range of clubs that are great for students to build their CV's and their confidence in interacting with people. Examples of the clubs they have is Chess club, Rugby club, Football club, Film club, Drama club and homework club, which I find the most helpful because teachers are there to help with homework if you find it difficult or if you need to print something you can do it there which I also find helpful.

The school has a lot of opportunities to go on school trips to develop their knowledge in Geography, History, English, Drama, Music and Languages. This improves their knowledge on their local culture and having school trips could improve your CV. You can also meet new people and increase your public speaking skills and your motivational skills. Having school trips strengthens the bond between teacher and student which makes it easier for the teacher because they get to know them well and know what they like to do and incorporate that in their teaching.
