

19th October 2019

Dear Parent / Carer,

This is to inform you that your child will take a science assessment on Friday 6th March during their science lesson. This test will cover biology, chemistry, and physics in that lesson.

A half – period 5

B half – period 1

Students have been given a Science revision workbook they can use and keep, which has a timetable they should be following as a minimum guideline for revision (set 5 students – this is kept in school). Students have also been given exam question packs to practice and mark; answers for these packs are available on FROG.

It is essential that your child attempts these exams with the aim of achieving the best possible results they can as these exams will give the pupils the indication of how their summer public exams will be received.

Topics that will be tested

Biology: B1 Cell level systems, B2 Scaling up, and B3 Organism level systems

Chemistry: C1 Particles, C2 Elements compounds & mixtures, and C3 Chemical reactions

Physics: P1 Matter, P2 Forces, and P3 Electricity and Magnetism (or P4 Magnetism in separate science).

Your child will also have Science assessments in March, covering the same topics, so that we can assess progress.

Revision resources can be found on Frog which include past paper questions, board works quizzes and mindmaps. Students also have access to the online textbook and further practice questions at <https://www.kerboodle.com>.

If you have any further questions please feel free to contact me on 0208 575 8222 (Ext 442)

Yours faithfully

Ms Ul-Haq
Second in Science/Key Stage 4 Manager
