

# Wiseman Career Lecture 13

We started 2024 with a Career Lecture on Monday 15<sup>th</sup> January, delivered by Sgt Andrew Mears from RAF Recruitment Team. It was wonderful to see all our Cadets from Y9 upwards attend in full force, as well as some 6<sup>th</sup> Form Maths and Physics students. We were all amazed at the variety of employment opportunities offered by RAF, from Aviation Crew and Technicians, Cyber Security, Engineering, Medical Services, to Logistics that include Chefs, Drivers and even Musicians.

Many of those roles are available as apprenticeships. RAF also offers Sponsored Degrees for many different subjects including Medical Doctors, Nursing or Engineering. This was a fascinating talk and many students stayed behind to chat to Sgt Mears privately afterwards.
