

Wiseman Career Lecture 15

On 5th February we had our second lecture dedicated to the topic of Apprenticeships. Our guest speaker and assessor, Ms Annice Abanda from Education Development Trust, was able to explain in great detail what the apprenticeships application process can involve and how to get ready for the different stages. She talked about interviews and the Assessment Day group activities. We then moved to a smaller venue where students were placed into 4 groups. They were given a scenario and had to complete a group task that involved a lot of discussions. They were marked by myself and Ms Abanda, the way they would be marked by an assessor during the group task as part of the Assessment Day. The criteria we applied to each observation were Communication, Teamwork, Leadership and Problem Solving. This was an excellent way to show students how they would be assessed if they were fortunate to progress to this stage in the application process.
