

Wiseman Career Lecture 16

Our Lecture number 16 on 19th February 2024 was delivered by a dynamic duo of Chelsie Ratcliffe-Cull, Early Careers Manager (talking to us from her offices over MS Teams) and an ex-Wiseman student Rugile Skemaite, Assistant Design Manager, from Overbury and Morgan Lovell. Both companies are part of the Morgan Sindall Plc - a leading UK construction and regeneration group. The group operates through its key divisions - Construction, Infrastructure, Office Design and Fit Out, Property Services, Partnership Housing and Urban Regeneration. They offer a wide range of different level apprenticeships and graduate positions within Civil Engineering, Interior Design, Project Management and Quantity Surveying amongst many other roles. There is a growing interest among our students in Degree Apprenticeships, therefore learning about all the opportunities offered by this excellent company is helping students to prepare for the very competitive process of applying.
