

SPARK! Careers workshop with Year 10 students

'We had an amazing sessions based around building our teamwork skills. We had to distribute different roles to the group based on our strengths. Once we had decided on roles, we were given finite resources (newspaper, sellotape, and 1 pair of scissors) to create a bridge that would stretch over a measured distance and be strong enough to hold a weight for 10 seconds. We worked well in our groups but we learned that some of us had strengths in areas we hadn't realised and that perhaps we needed to volunteer for different roles next time. We are looking forward to building our skills with even more volunteers from different sectors coming to visit us in December.'

Thank you to Ms Morgan for organising the event.
